## Enterprise GIS Implementation

New Century Software can help your company design and implement a GIS at any level. Whether your company is large or small, whether your existing data is paper-based, CAD-based or a legacy mainframe database, we provide a full range of services that will enable you to deploy a successful, state-of-the-art enterprise GIS system. Our proven processes ensure your organization realizes the business benefits of reducing redundant data entry, improving the accuracy and completeness of data, and providing data efficiently to those who need it. New Century Software offers extensive domain knowledge as well as GIS and IT expertise to help you achieve the strategic goals of your organization.

The professional services offered by our firm to ensure that the system, architecture, and business logic is sound include:

- GIS needs assessment
- Key stakeholder interviews
- User surveys
- Requirements workshops
- Business use case development
- Data model design and consulting
- Integration of GIS with third-party applications such as SAP, LandWorks, and WinFlow
- Application requirements and functional design
- System architecture design
- User workflow planning and design
- Software deployment
- Data conversion and migration
- Pipeline and asset integrity management data integration
- Data loading
- RFI/RFP preparation
- Hosted services for data and applications
- Mapping services including centerline routing and digitizing structures
- Database and application training
- Technical support
- Custom application development

A true enterprise solution includes an integrated suite of applications to manage pipeline GIS data. New Century Software is a leader in developing software for oil and gas pipeline operators in a number of product categories:

#### Data Loading Applications

- RouteLoad Express
- GPS DataLoader

#### Data Maintenance Applications

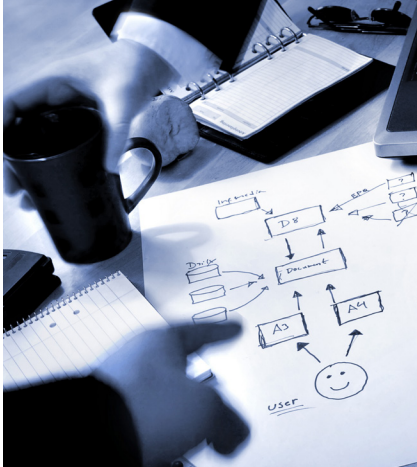

- Facility Manager WebEdit
- Facility Manager
- SpatialSynchronizer

#### Mapping and Reporting Applications

- SheetCutter
- TemplateDesigner
- SheetCutter Server
- Centerline Browser
- Deep Sea Viewer

#### Integrity management applications

- Spatial Risk Analyst
- Spill Impact Analyst
- Gas HCA Analyst
- iAlign
